

Raja Muppidi

Software Engineer III, Infrastructure, Core

demo@demo.com | 111342453 | Glendale, CA

Professional Summary

Experienced Software Engineer with expertise in infrastructure and distributed systems. Proven track record in software development, algorithms, and data structures. Skilled in building scalable, accessible technologies. Ready to drive innovation and efficiency in core infrastructure solutions.

Work Experience

Sotware Engineer

Mindaigle | New York

- Designed and implemented a structured filing system, increasing organizational efficiency by 30% through improved data retrieval processes.
- Led cross-functional team meetings to streamline operations, enhancing team collaboration and reducing project timelines by 15%.
- Analyzed operational workflows, identifying key areas for automation, which resulted in a 20% increase in productivity.
- Managed project timelines and resources effectively, ensuring all deliverables were met within budget and ahead of schedule.
