Raja Muppidi

Software Engineer III, Infrastructure, Core

demo@demo.com   111342453   Glendale, CA

Summary

Experienced Software Engineer with expertise in infrastructure and distributed systems. Proven track record in software development, algorithms, and data structures. Skilled in building scalable, accessible technologies. Ready to drive innovation and efficiency in core infrastructure solutions.

Skills

Technical Skills

Software development   Programming languages   Data structures   Algorithms

Infrastructure development   Distributed systems   Networking   Compute technologies   Storage

Hardware architecture

Soft Skills

Versatility   Leadership qualities   Enthusiasm   Problem-solving   Project management

Prioritization   Deadline management   Team collaboration   Adaptability   adadad

Work Experience

Sotware Engineer   2024-08-12 - Present

Mindaigle | New York

- Designed and implemented a structured filing system, increasing organizational efficiency by 30% through improved data retrieval processes.
- Led cross-functional team meetings to streamline operations, enhancing team collaboration and reducing project timelines by 15%.
- Analyzed operational workflows, identifying key areas for automation, which resulted in a 20% increase in productivity.
- Managed project timelines and resources effectively, ensuring all deliverables were met within budget and ahead of schedule.
